DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, and 30-32 drawn to a method of monitoring chemical effects on an optically emitting sample, classified in class 436, subclass 2.
 - II. Claims 16-24, drawn to a method of monitoring optical emission from a chemically treated sample, classified in class 436, subclass 164.
 - III. Claims 25-29, drawn to a method for optically imaging a sample, classified in class 382, subclass 133.

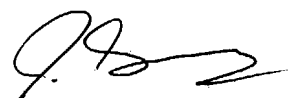

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation and different effects. Invention I measures an optically emitting sample to determine chemical affects on the emissions. Invention II measures optical emissions resulting from introduction of chemicals. Thus, invention II envisions a non-emitting sample to which is added optically emitting agents for subsequent analysis. Invention III operates to produce an optical image of a treated sample, which imaging forms no part of either invention I nor invention II.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey R. Snay whose telephone number is (571) 272-1264. The examiner can normally be reached on Mon-Fri.
